

C.V. (Zhongyi Jiang)

Zhongyi Jiang is a professor at School of Chemical Engineering and Technology of Tianjin University. He obtained Ph.D. degree in Chemical Engineering from Tianjin University in 1994. He is the winner of the National Science Fund for Distinguished Young Scholars (China).

He was a visiting scholar of University of Minnesota with prof. Edward Cussler in 1997 and a visitor in Chemical Engineering of California Institute of Technology with prof. David Tirrell in 2009.

His research interest encompasses biomimetic and bioinspired membranes and membrane processes, nanostructured materials and enzymatic catalysis.

He co-authored over 340 SCI papers including 100 papers on *Journal of Membrane Science*. Till now, the total citation time is over 6800, and h-index is 43.
